

BSc (Hons) Computing

Awarded by Arden University, United Kingdom · Delivered in Bangkok by ADVEX Management School

Systems, data and software practice for technical staff formalising an IT career.

Plenty of capable developers and IT staff in Bangkok are held back by a missing line on the CV rather than a missing skill. This final year closes that gap with a full UK computing degree.

Four core modules cover data mining, cloud and distributed computing, information security management and a substantial computing project, with two electives on top. Arden aligns its learning resources with Oracle, Microsoft, Cisco and AWS, so vendor certification runs in parallel with the degree.

Key facts

Award title	BSc (Hons) Computing (Top-Up)
