

MSc Health and Care Management (Top-Up)

Awarded by Arden University, United Kingdom · Delivered in Bangkok by ADVEX Management School

Service design, quality and governance for senior roles across hospitals and care providers.

A single research module completes the master's. You choose a live issue in health or care — ideally in your own workplace — and take it from proposal through ethics to a final report written for an executive team, not for a filing cabinet.

Each student is supervised individually. The output is the kind of document that gets a project approved, which is why graduates use it as evidence for promotion as often as for further study.
